Bauman Moscow State Technical University, Moscow, Russian Federation

Keywords

In this paper market economy is introduced as a system, necessary and sufficient elements of which, namely 7 variables, are analyzed. These variables are: the institute of private property, based on factors of production, free motion of production factors domestically and abroad the country, price mechanism, limited state intervention in the economy, development of competition institute, creation of the regulatory framework, formation of a model of a socially responsible market person. According to principles of sustainable development and orientation on non-material economy we justified the need for development of society, the main components of which are the information flow and intellectual property.

Market economy, non-material economy, necessary and sufficient elements of market economy, principles of sustainable development
